

# Oxide-Mixed Potential: Florida Mountain West

- Surface drill target of over 2000 m long x +50m wide zones of potential Oxide material
- Mineralization has been identified to a potential depth of 70m
- Sample intercepts include (historic drill holes):<sup>1</sup>
  - F0482: 0.79 g/t AuEq / 32.00 m
  - F0481: 1.36 g/t AuEq / 15.24 m

Rich Gulch & Blue Gulch

1. Historical drill holes. These historical drill holes are relevant for historical context and are not being included current mineral resources or mineral reserves. Gold equivalent = g Au/t + (g Ag/t / 77.70)
